

Simplified Security Wins with RapDev & Guard Dog

Security customers are looking for fully operational security programs, backed by both products and SOC.

RapDev has a dedicated Security Practice and Managed SOC, meaning we are uniquely positioned to help you across the lifespan of a Security deal:

1. Identify security gaps and accelerate pre sales

2. Execute migration & implementation

3. Managed SOC & expanded DD security product adoption

A free security assessment for ANY security deal. No cost. Just instant value add for your customer.

What We Do:

- A free SIEM audit or security posture assessment for your customer. RapDev-led, jointly delivered.
- Surface detection coverage gaps & blind spots
- Identify noisy alerts & quality issues hurting SOC productivity
- Highlight underused Datadog modules
- Provide a prioritized risk-based security roadmap aligned to Datadog Security

Bring Us In When:

- Datadog Security purchased, but not fully deployed
- SIEM alerts are noisy or poorly tuned
- Prospect evaluating SIEM and you need differentiation to win
- No SOC or underperforming SOC
- Compliance pressure with no clear path forward
- Competing against Splunk, QRadar, or similar

Zero cost, quick turnaround Security assessments for EVERY Guard Dog prospect.

“RapDev has been a valuable partner in maintaining the integrity and reliability of our security operations. RapDev's responsiveness to alerts and incidents has been timely and well-documented, enabling us to make informed decisions quickly.”

— DevSecOps Manager, FinServ Customer
