Speed & Stability: Executing a Seamless Infrastructure Migration in Record Time

RapDev's implementation of Datadog in just 2 months reduced incidents and saved 70% of log costs

Migrating critical infrastructure & improving MTTD

Business Challenges & Technical Solution:

Existing system approaching end-of-life; implemented infra & log monitoring for on-prem & cloud services in 2 months

Consolidated multiple tools & alerts, which were giving too many false alarms

Implemented centralized logging, tag strategy, & automation

Engagement Results

6k

cash registers & payment systems & 620 hosts with end-to-end observability

\$100k

saved/year on tool consolidation

70%

reduction in log management costs

"With the help of RapDev, we now have detailed incites that **surpasses everything we had before, which was very limited and didn't include any cloud observability.**"

— Head of IT Operations, Coop Norway
