

— CASE IN POINT | DATADOG + GLOBAL HOLDINGS

Modernizing Monitoring with Accelerated Adoption

RapDev's Datadog implementation automated 81% of deployments, improved visibility, and reduced host duplication by 42%

Global Holdings' journey to enhancing efficiency, security, & visibility with Datadog

Business Challenges & Technical Solutions:	Engagement Results:	
Over 4 months, led migration from PRTG, Site24x7, ThousandEyes to Datadog	250+	monitors ported & consolidated
Audited & rightsized virtual machine resources for better efficiency	15+	core APIs & 2 critical apps deployed
Automated monitoring across infra & APM using Ansible for improved scalability	81%	reduction in deployment time & 42% reduction in host duplication
Implemented Product Analytics to improve visibility into customer journeys	10	products across infrastructure, DEM, network, security, logs, & APM
Deployed APM & RUM for enhanced visibility into app performance & user behavior	83	services implemented with Ansible automation platform

"The ability for RapDev to customize the offering and be flexible during the entire engagement has been second to none. It is by far the best experience I've had."

— Director of Infrastructure, Global Holdings
