

— DATADOG EXPERTISE

Powering High-Volume Financial Services Systems with Datadog & RapDev

RapDev modernizes financial services observability across payments, authorizations, and cloud infrastructure to improve reliability, reduce operational risk, and support always-on transaction platforms.

Delivering measurable financial services outcomes with Datadog

<p>Leading Financial Institution</p> <p>\$1.5M</p> <p>annual savings via tool consolidation & optimized telemetry</p>	<p>beyond.</p> <p>72%</p> <p>reduction in operational alert noise</p>	<p>global</p> <p>81%</p> <p>reduction in deployment time</p>	<p>Digital Financial Services Provider</p> <p>83%</p> <p>monitoring coverage achieved, up from 30%</p>
--	--	---	---

Engineering foundations for resilient financial services observability

<p>Transaction, Authorization, & Digital Experience Visibility</p>	<p>End-to-end visibility across payment flows, authorization services, APIs, and digital channels to proactively detect issues before they impact transactions or revenue</p>
<p>Operational Resilience & Incident Response</p>	<p>Advanced alerting and real-time monitoring with automated response workflows to reduce transaction downtime and strengthen system resiliency</p>
<p>Cost-Efficient Observability at Scale</p>	<p>Consolidated dashboards and standardized monitoring to reduce tool sprawl, control observability costs, and improve signal quality</p>
<p>Governance, Security, Risk & Compliance Readiness</p>	<p>Consistent tagging, enforced standards, and platform guardrails to ensure secure, scalable operations in regulated financial environments</p>
