

— DATADOG EXPERTISE

Powering Reliable Healthcare Operations with Datadog & RapDev

RapDev modernizes healthcare observability across applications and infrastructure, supporting **HIPAA-regulated environments with auditable telemetry, guardrails, and self-service operations**

Delivering measurable healthcare outcomes with Datadog

Leading Healthcare Provider

\$1.2M

annual cost savings via tool consolidation

47%

reduction in alert volume, lowering operational overhead

31%

faster incident detection, reducing downtime

Healthcare Software Provider

\$850k

annual engineering cost savings from reduced troubleshooting time

63%

reduction in support and incident response effort

25%

improvement in platform performance KPIs within 3 months

Engineering foundations for unified healthcare observability

Clinical Application & User Experience Visibility

Unified visibility into performance and user experience with APM, RUM, and Synthetics to identify issues before they impact care delivery.

Healthcare Operational Resilience

Advanced alerting, real-time monitoring, and automated workflows to reduce downtime, accelerate incident response, and strengthen operational resilience across clinical systems.

Cost-Efficient Healthcare Observability

Consolidated dashboards and optimized monitoring that reduce alert fatigue and operational overhead while improving visibility.

Governance & Compliance Best Practices

HIPAA-aligned observability with standards and guardrails for secure, scalable operations.
