Log Assessment

Cut log costs. Keep every critical insight.

Log data is one of the fastest-growing observability costs. RapDev partners with Datadog to help reduce logging costs by **eliminating noise, fine-tuning retention, enforcing governance, & replacing overused logs with metrics or APM data**.

Transform your logging approach with targeted Insights & Datadog best practices

Playbook for Smarter Logs

- Log strategy & optimization plan
- Data analysis documentation (volume, retention, source patterns)
- Technical recommendations (tagging, parsing, filtering, routing)
- Strategy session with engineering & platform teams

Fast, Focussed & Functional

- **Timelines:** 2-4 weeks
- **Inputs:** Existing logging tool exports (i.e. Splunk, ElasticSearch, SumoLogic, etc), log samples, & environment context
- **Deliverables:** Full documentation & live strategy walkthrough sessions

Delivering tangible ROI through smarter logging strategies for leading enterprises

oneZero FINANCIAL	**1400%**	retention increased during **cost-neutral SIEM AlienVault migration**
JLL	**48%**	reduction in technical debt through **log dashboard/monitor analysis**
dexcare	**40%**	of logs were found to be unused, **informing rationalization & pipeline tuning strategies**
BCG	**3**	seconds on average vs 15-minute **log queries on similar log volumes**
