

RapDev's Free Pre-Sales Splunk Analysis

Know what's worth migrating.

Share your Splunk exports. Get back a clear view of migration scope, log volume savings, and security gaps. Free, no commitment.

WHAT YOU WALK AWAY WITH

Migration confidence

Inventory of every detector and dashboard: migrate, rebuild, or retire.

Cost Optimization

Log volume reduction estimate with the right data type per use case.

Security Gap Visibility

Coverage mapped to MITRE ATT&CK with prioritized gaps.

CONCERNS WE ADDRESS

Mitigation & Cost

- What SPL logic is worth migrating vs lifting-and-shifting debt?
- Where does indexed logging end and Flex Logs begin?
- Where are your log-to-metric conversion opportunities?

Security & Modernization

- Where are detection gaps across cloud, identity, endpoint, and network?
- Which detectors are noise vs mission critical?
- How do you dual-ship to validate signal parity before retiring legacy alerts?

HOW IT WORKS

1. Data Collection

Run our Splunk query list and export CSVs. Under 1 hour of effort.

2. Analysis

Log source inventory, detector scoring, MITRE ATT&CK mapping, and RBAC review.

3. Output

Datadog logging strategy, migration roadmap with effort tiers, and right-fit data type guidance.
