

Re-Engineering Envision's SPM to Align Strategy and Execution

By simplifying complexity and enabling real-time visibility, RapDev delivered a modern, data-driven framework that **boosted intake cycles by 55% and transformed how Envision plans and executes strategic work.**

Automating demand-to-delivery pipelines for strategic alignment

Challenge & Technical Solution	Business Impact
Standardized demand intake across portfolios, eliminating spreadsheet-based triage	55% faster intake cycles , cutting demand-to-project creation from ~220 to ~100 days
Enforced cost plan governance to unify expense tracking in SPM	100% of expenses tied to cost plans , enabling real-time financial reporting
Centralized forecasting in SPM dashboards, retiring Smartsheet	2% forecast variance, reduced from 37% , strengthening budget control
Expanded SPM portfolios to onboard business teams as system-of-record users	174 active projects and demands in SPM , serving as the system of record

"RapDev implemented SPM from the ground up, **reversing prior customization** and **aligning us to an OOTB, sustainable model**. Their engineering-led approach simplified workflows, improved portfolio visibility, and gave leadership a clear line of sight from strategy to delivery."
